

Hello, I am filing this preliminary application for format changes to the submitted utility application 10/810178. submitted are all drawing changes to include a 'cross hairs' in corner of application and removal of a line running on the edge of the drawings.

All claims are amended to a bullet format rather than a paragraph format

Please accepted the current printout and drawings for the corrected format changed, I have not added no new improvements to the invention, or new material
